

## **Economic Inclusion**

Regular workshops are held to equip the co-ordinators with new skills and activities that they need to implement in their communities. The activities that they train the kids are sewing, good hygiene, Climate Change and the environment, and food gardening. They have sewing projects that creates work for women in the community. The organisation created lady bags with sanitary pads and everything that a girl might need. The lady bag is suitable to carry anywhere and everywhere. Women and young girls are also trained to sew Wonderbags and this is being sold and the profit is being applied back to the community projects.
